But she simply is incabe economical. But she simply is inca-pable of it. So more goes out of the pable of it. So more goes out of the delightful companion she had always back door in the garbage can than the been, but he realized she was no cook or is always elaborate and consists of ribby the front door in his pocketbook.

Some women seem absolutely incapable of being economical. They are really clever, efficient women in other ways, but at the problem of saving they fail. One woman with a family of six makes her own and all the children's clothes, which seems a great achievement, and saves "oodles of money," as she tells her husband. But she takes no care of the clothes when made. Rips are never mended; holes are never patched; stockpenses are each month. ings are thrown away instead of being darned. Consequently the bills for dress are enormous. The amount saved for making the clothes is far over-balanced by the amount lost by not caring for them. And this she seems utterly inca-

pable of doing. Another housewife is wasteful because she never puts anything in its place; never knows where anything is, and, consequently, is continually buying anew, Another cooks more food than is eaten, and throws it away; takes no care of milk and vegetables, and the one sours and kitchen is appalling.

And so the tale of wastefulness runs n many a home. One man solved the problem by giving ip housekeeping and going to boarding.

It is a fact universally recognized today that in the matter of woman's dress there are no "mere details." and that every item of her toilet has a part in producing a total and harmonious effect. Thus, if a woman wishes to appear well dressed it is not sufficient to have her hat and frock in the latest style; she must also see that her veil, the handle of her umbrella, her scarf, even her handbag, all conform to the tendshe was, and because she was a good ency which rules the fashion of the
